People

Proger is an international leading company with the best Italian experts in the management, engineering and security sectors. Over the last 60 years, Proger has witnessed a continuous growth at national and international levels, ensuring competitiveness and flexibility thanks to its skilled resources and its ability to propose an integrated offer always in step with the times.

We are General Engineers

The complexity of the systems and processes of a major project requires differentiated technical and specialized contributions, where the value of each element and its subsequent integration are fundamental to achieve the best results. Being a general engineer means having an overall vision and a balanced combination of technical, operational and managerial skills, as well as strong social, ethical and aesthetic sensitivity. Over the years, this has allowed Proger to make the difference and to act as a single interlocutor, able to ensure the development and execution of large-scale multidisciplinary projects and to assist its customers in every phase of the project.

A unique partner able to cover the whole life cycle of a project, in terms of engineering and management, and to protect people and material assets. Proger provides integrated design, programming, monitoring and control services that ensure the commercial and financial practicability, the operational functionality and sustainability of the project, with constant attention to its context.

Sectors of interest

Proger supports the top management decision-making processes, indicating the risk factors (“red flag”) and providing useful tools to face the different situations for the development of conscious and safe choices. Thanks to the close cooperation between its strategic analysts and operating teams, Proger is able to intervene immediately in any area of the world.

Security first

Strategic Analysis

Today, having access to information is fundamental to a company’s strategic goals. Understanding markets, economic, political, security dynamics, along with its interlocutors, is a primary tool for the development of conscious choices.

The objective of the *Strategic Analysis* division is to provide the client with useful analyses to plan the company policy, offering decision-makers information to support them effectively in managerial choices, mitigating risk.

Proger is able to provide concrete assessment elements to work in all sensitive areas: through detailed and constantly updated reports, the company offers a comprehensive overview of the socio-political and economic situation of each country, critical issues and international threats such as terrorism, crime, corruption, political instability and health risks. The analysis thus constitutes a privileged knowledge tool for the top management, useful for planning short and long-term interventions.

Financial Security & Monitoring

- Institutional financial architectures and solutions
- Transaction monitoring and control/compliance
- Safe harbour solutions providers
- Protection of assets, assets recovery and negotiation

Institution Enhancement & Good Governance

- Regulation support (training, advisory, monitoring, national and international)
- Policy audit and enhancement
- Smart gov and IT integration for states and institutions
- Domestic, regional and international government/policy marketing

Research & Geopolitical Analysis

- Country profiles
- Geopolitical Analysis & Reports
- Political Risk Assessments
- High Risk Markets
- Social Conflict and Subversion Monitoring Centre
- Weekly Forecasts
- Situation Reports

Intelligence & Due Diligence

Thanks to highly qualified analysts with different backgrounds (legal, financial, economic and social), the Intelligence Services division works worldwide supporting its clients through advanced due diligence, business intelligence, auditing and litigation advisory, guaranteeing confidentiality, anonymity and data protection services.

Regardless of whether a company is contracting new business partners or exploring new markets, Proger is able to analyse and validate its identity, professional history, company holdings and to verify the existence of protests or other negative elements, such as fraud, money laundering and corruption, in order to reduce the risks associated with these activities and to enhance the company’s opportunity to grow.

Due diligence

- New client screening (KYC, AML)
- Partners verification (M&A, Financial, IP, Commercial)
- Transaction reports (M&A, investments, equities, etc.)
- HR & background checks
- OSINT (Open Source Intelligence)
- HUMINT (Human Intelligence)

Reputation & Lobbying

- E-reputation monitoring & management
- Policy & political marketing
- Reputation control
- Media and e-media trainings and capacity buildings

Litigation Mitigation Arbitration

- Defensive or aggressive solutions operations
- Assets recovery, assets protection, assets structurations

Additional services

- M&A Due Diligence
- Criminal Due Diligence
- Intelligence Reports
- Asset Re-Building and Audit
- Asset Localisation
- E-Reputation Monitoring
- E-Reputation Management
- Reputation Resilience Reporting

Security Services

Doing business in high risk areas can be a challenge because of the unpredictability of all the elements that come into play.

The Security Services team provides highly specialized services in the *Physical Security*, *Travel Security* and *Field Security* sectors, determining the client's needs for what concerns protection - including physical protection - and identifying the most appropriate and customized solutions depending on the situation.

Proger takes care of the safety of its workplaces and employees abroad through a 24/7 monitoring, coordinated from a dedicated room. The company is able to inform the employee about the specific risks of the country he is working in and, in case of emergencies - such as bomb alerts, political instability, terrorist acts, sabotage or violent weather phenomena - it promptly activates a unit specialized in high-risk activities, such as exfiltrations and evacuation.

Physical Security

- Engineering
- Evaluation & Replanning
- Surveillance
- Counter Surveillance

Field Security

- 24/7 Assistance
- Constant Monitoring
- Survey Missions
- Emergency Response Unit

Travel Security

- Country Profile
- 24/7 Assistance
- Real-Time Alert Service
- Loc-Me System
- Escort Protection
- Security Assessment & Evacuation Plan
- Crisis Management

Communication & Information Control

- Internet Surveillance Systems
- Real time communication war rooms
- Mobile communication surveillance (phone, txt, tools, skype, whatsapp, etc.)
- Counter terrorism and crime
- Communication control

Cyber Security

In contemporary digital society, if on one hand data have surely become strategic assets, on the other hand cybercrimes are more and more sophisticated and able to jeopardize the security systems of countries and companies due to ever more specialized techniques and methods. Nowadays, issues relating to information security are a constant concern for the management of a company because a “data breach” represents a significant loss in terms of time, resources and revenues.

Proger is able to serve an organization that has suffered an IT security accident and to support it to prevent such an event from occurring again in the future, combining the use of the most advanced digital expertise techniques with traditional investigative techniques - including investigation and surveillance activities - and offering security consulting services, ranging from risk assessment to penetration testing, to verify its defences.

IT Security

- Cyber warfare and cyber interception
- War rooms
- Cyber surveillance (access, borders, airports, etc.)
- Network solutions and control
- Voice Encryption

Consulting & Security Services

- Identity Management Consulting
- Application Security Services
- Cloud Security Services
- Endpoint Security Services
- Identity and Access Management
- Risk Management Centers
- Regular Controls and Audits
- Pen-test

Training Services

Seconded personnel do not always have the necessary knowledge and skills to interact with the local population and do not have the right experience to face dangerous situations.

Proger organizes training courses on security and safety based on innovative methodologies held by highly specialized teachers.

Thanks to staff members of élite armed forces from different countries, Proger is able to organize and carry out training activities for special needs and institutional customers.

The strong points of the training division are the programs dedicated to police and to special and élite forces.

Security Training

- Cultural Awareness
- Risk Mitigation

Special Operations

Proger's great experience allows the provision of consultancy activity and specific services for the organization of special operations for institutions, government agencies and international companies.

Safe cities, border management, assessment of strategic infrastructures and solutions against terrorism are just some examples of our possible fields of intervention. Moreover, Proger has the necessary skills to manage paramilitary operations in the field of personnel protection, assisting government units in high-risk areas. In addition, Proger is able to offer strategic solutions in the analysis, risk management and crisis recovery sectors that require specialized knowledge, confidentiality, reliability, efficiency and technical skills.

Special Operations

- Site securization
- Travel security
- Bodyguards and enforcement
- Exfiltration

Problem Solving and Analysis Research Center

The Problem Solving and Analysis Research Centre is a multidisciplinary group of experts and academics dealing with the analysis and understanding of risks associated with human decisions (in particular extreme risks with a low occurrence probability, but with potentially catastrophic consequences) by providing efficient and consistent assessment.

Areas of applications

- Raw materials markets
- Energy markets
- Renewable energy markets
- Food source markets
- Drug and vaccine markets
- Pollution and climate change
- Water
- Waste
- Pandemics and infectious diseases
- Natural disasters and catastrophes
- Investment projects
- Non-market Assets

Crisis management and personnel evacuation

LOCATION	Oasis of al-Kufra Libya
