

PRESS RELEASE

PROGER BETS ON SECURITY.

The company announces the closing of the acquisition of a branch of the company G-Risk

Rome, 1 October 2017 – Proger, a leading company in the **Engineering & Management** sector in Italy and the world, announces the acquisition of the “**Security**” branch of the company G-Risk, a specialized partner in risk analysis and security management with an average turnover of 4 million euros over the last 5 years.

The operation aims at enhancing Proger’s know-how and its skills, by consolidating the ability of the company in offering high quality solutions for the **protection of critical infrastructures and the safeguard of the territory, assets and people.**

This acquisition is part of a greater development plan that, over the years, has led the company to systematically increase and integrate new skills in order to propose a wide range of services able to cover the different parts of a project and to meet the clients’ needs, both private and public.

At the same time the initiative marks an important step in the growth strategy that, thanks to alliances combining highly qualified and experienced partners in the Security field into a single entity, bound together by the strength of engineering and management, aims to create a **real *Integrated Security Pole.***

*“Today security is a global issue which requires accurate answers because, if it is difficult to anticipate threats, we have to do our best to prevent them”, states **Umberto Sgambati**, Proger’s CEO. “This is a transversal issue for us as it brings together security and safety and embraces all our activities, from healthcare to infrastructure, from building to energy. Investing in this field, by enriching our skills and grafting specialized synergies thanks to **partnerships with the best experts**, means to offer our customers unique solutions, fully able to support them, in planning, execution, and project management. At the same time we will be able to guarantee security solutions based on innovative technologies and systems”.*
